Mystery Island

You will create a map of a fictional island to show examples of different landforms and bodies of water. The map must be three dimensional. You will name your physical features with a name that also labels the type of feature it is (for example: Hagens Hill). The map must show the difference between similar features (like a bay versus a gulf). Each map will have a key, a compass rose to show directions, will be completely colored and labeled, and will include 10 landforms and 10 bodies of water.

Landforms:

Required

- Cape
- Isthmus
- Peninsula
- Erg
- Escarpment

Your choice

- 1.
- 2.
- 3.
- 4.
- 5.

Bodies of Water:

Required

- Bay
- Gulf
- Fiord
- Inlet
- Sound

Your choice

- 1.
- 2.
- 3.
- 4.
- 5.
